HIGH VOLTAGE
INDUSTRIES

INSTALL HVI CRM ON YOUR IPHONE

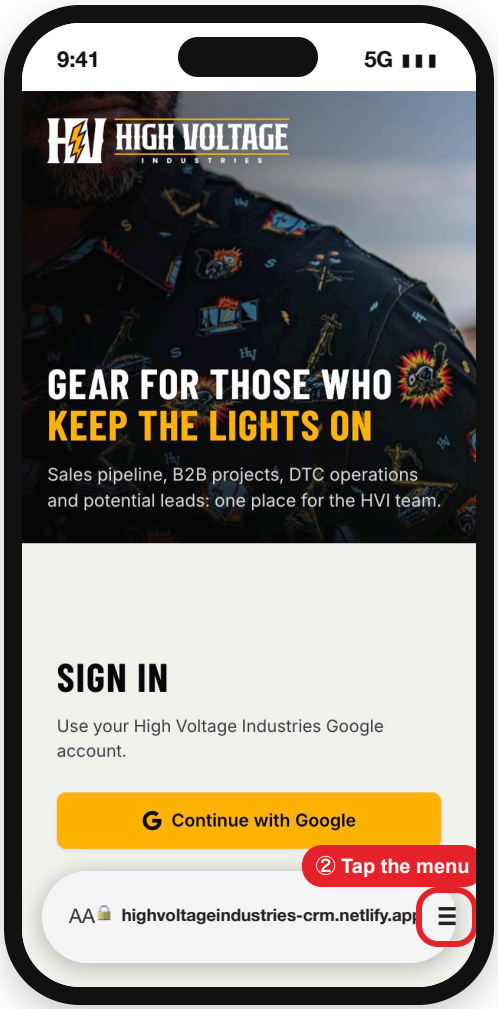

Add the HVI CRM to your Home Screen so it opens like a regular app: full screen, with its own icon, in a few taps. It takes about one minute and works on any iPhone.

https://highvoltageindustries-crm.netlify.app

You need: an iPhone with a recent iOS, the Safari app, and your High Voltage Industries Google account.

STEPS 1 & 2 · OPEN IT IN SAFARI AND TAP THE MENU

Use **Safari** (the blue compass icon). Illustrations follow the latest iPhone and Safari design.

1 Open the HVI CRM link in Safari

- Open **Safari** and go to: **highvoltageindustries-crm.netlify.app**
- Sign in once with **Continue with Google** using your High Voltage Industries account.

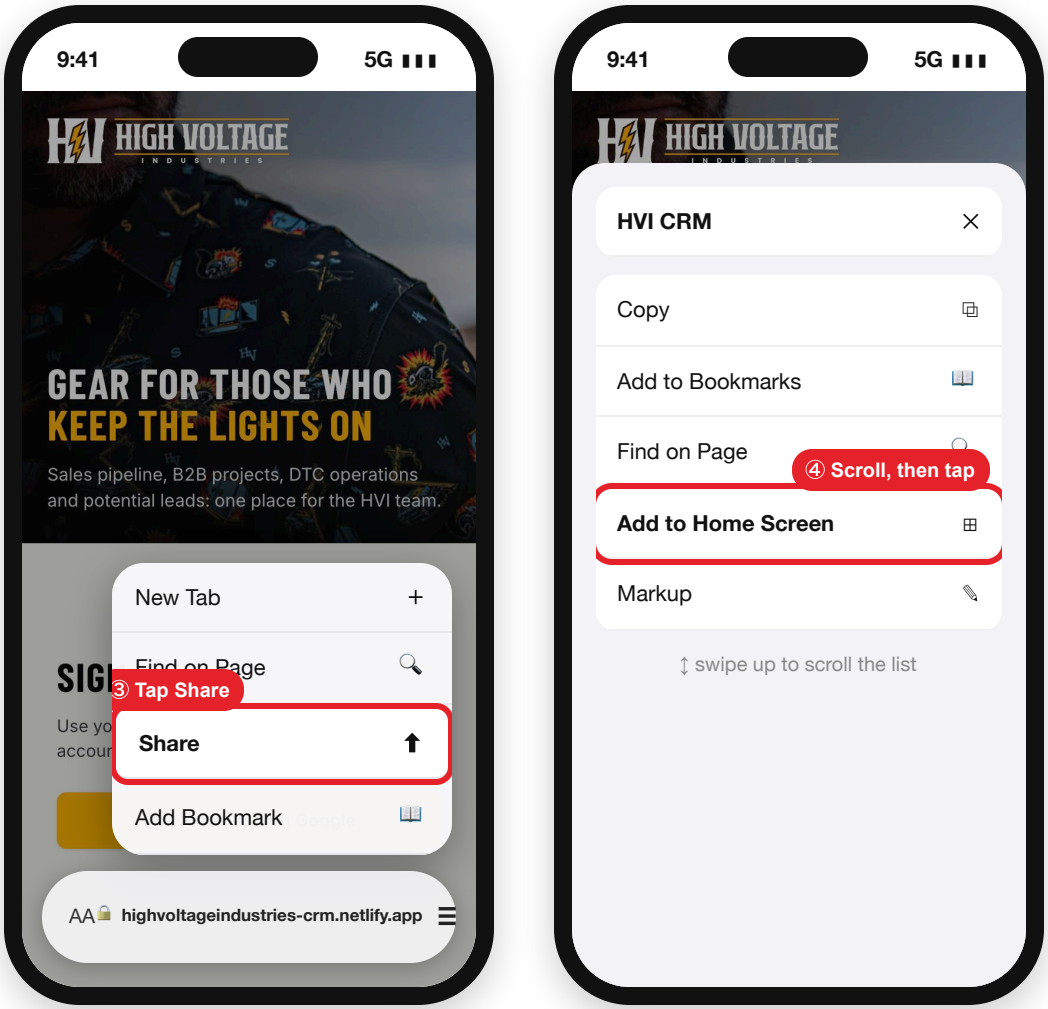

2 Tap the menu button in the bottom bar

- Look at the **bar at the bottom of the screen**. Next to the page address there is a **menu button** (three lines or three dots, depending on your iOS version), marked in red.
- Tap it. A menu opens above the bar.
- If the bottom bar is hidden, tap the very bottom edge of the screen or scroll up a little.

> **Tip:** if you opened the link from Gmail, Slack or another app, first tap **Open in Safari**. The Add to Home Screen option only appears in Safari itself.

STEPS 3 & 4 · SHARE, THEN ADD TO HOME SCREEN

The first menu leads to the share sheet, where the option is further down.

3 Tap “Share”

- In the menu that opened, tap **Share** (square with an arrow pointing up).

4 Scroll down and tap “Add to Home Screen”

- Swipe the share sheet **up** until you see **Add to Home Screen** (square with a plus sign). On an iPhone set to Portuguese it reads **Adicionar à Tela de Início**.
- Tap it.

Cannot find it? Scroll to the very bottom of the share sheet and tap **Edit Actions…**, then add **Add to Home Screen**. Make sure you are in Safari and not in another app's built-in browser.

STEPS 5 & 6 · NAME IT, ADD IT, OPEN IT

Confirm the name, then find the new icon.

5 Check the name and tap “Add”

- The name is pre-filled as **HVI CRM**. You can change it if you like.
- Tap **Add** in the top-right corner.

6 Open HVI CRM from your Home Screen

- Find the black **HVI CRM** icon (it may be on your last Home Screen page).
- Tap it: the CRM opens **full screen**, without the Safari address bar, like an app.
- Tip: press and hold the icon and drag it to your first page or into your Dock.

TIPS & TROUBLESHOOTING

Things the team asked about most often.

Question	Answer
I am asked to sign in again	Use **Continue with Google** with your High Voltage Industries account. You may need to sign in once inside the app; after that it remembers you.
Will I get updates?	Yes, automatically. The app always loads the latest version of the CRM; there is nothing to update in the App Store.
Is data synced with my computer?	Yes. It is the same CRM and the same data, only in a phone-friendly layout.
Dark mode	Open the menu (≡ at the top-left of the CRM) and tap the sun/moon button to switch between light and dark.
Where is the CRM menu?	Tap the ≡ button at the top-left of the CRM to open the navigation (Pipeline, Leads, Projects, DTC, and more).
The option is missing	Open the link in Safari (not inside Gmail, Slack or another app) and make sure your iPhone is up to date.
How do I remove it?	Press and hold the icon, tap **Remove App**, then **Delete from Home Screen**. Your data stays in the CRM.
Using Chrome on iPhone	Recent iPhone versions can also do this from Chrome (Share → Add to Home Screen), but Safari is recommended.
