INDUSTRIES

INSTALL HVI CRM ON YOUR IPHONE

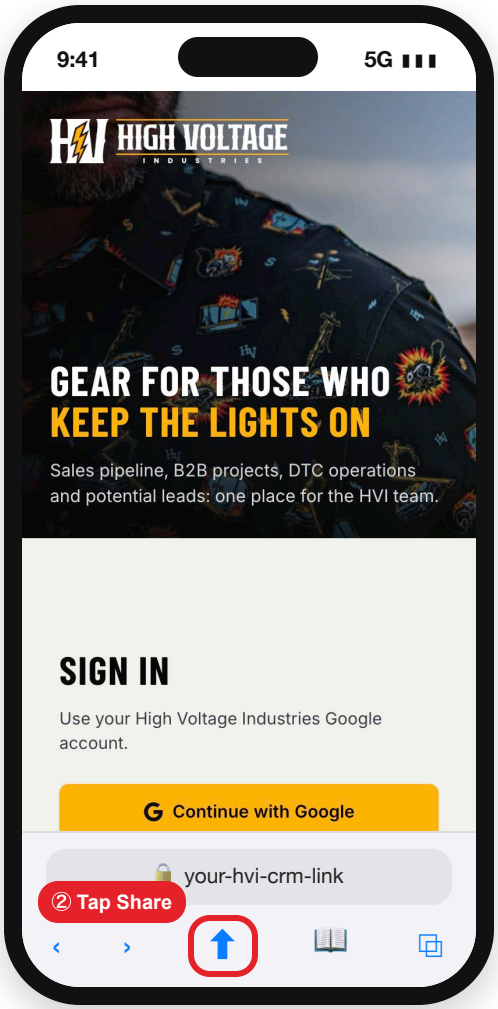

Add the HVI CRM to your Home Screen so it opens like a regular app: full screen, with its own icon, in a few taps. It takes about one minute and works on any iPhone.

HVI CRM link: _____

You need: an iPhone with iOS 16.4 or newer, the Safari app, and your High Voltage Industries Google account.

STEP 1 & 2 · OPEN IT IN SAFARI AND TAP SHARE

Use **Safari** (the blue compass). On iPhone, Safari is the most reliable browser for this.

1 Open the HVI CRM link in Safari

- Open **Safari** on your iPhone.
- Type or paste the HVI CRM link in the address bar and go.
- Sign in once with **Continue with Google** using your High Voltage Industries account.

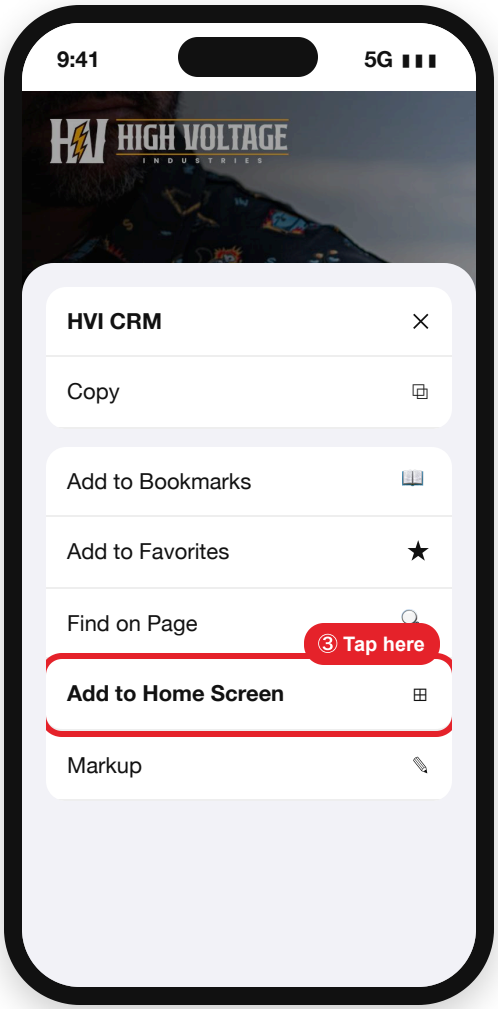

2 Tap the Share button

- It is the **square with an arrow pointing up**, in the bar at the bottom of the screen (marked in red on the screenshot).
- If you do not see the bottom bar, tap once at the bottom edge of the screen or scroll up slightly.

> **Tip:** if you open the link from an email or chat app, tap the compass / “Open in Safari” icon first. The Add to Home Screen option only appears in the browser itself.

STEP 3 · CHOOSE “ADD TO HOME SCREEN”

The Share menu opens from the bottom of the screen.

3 Scroll the menu and tap “Add to Home Screen”

- Swipe the list **up** until you see **Add to Home Screen** (a square with a plus sign).
- Tap it.

Cannot find it? Scroll all the way down and tap **Edit Actions…**, then add **Add to Home Screen** to your list. Also make sure you are in Safari and not inside another app's built-in browser.

STEP 4 & 5 · NAME IT, ADD IT, OPEN IT

Confirm the name, then find the new icon.

4 Check the name and tap “Add”

- The name is pre-filled as **HVI CRM**. You can change it if you like.
- Tap **Add** in the top-right corner.

5 Open HVI CRM from your Home Screen

- Find the black **HVI CRM** icon (it may be on your last Home Screen page).
- Tap it: the CRM opens **full screen**, without the Safari address bar, like an app.
- Tip: press and hold the icon and drag it to your first page or into your Dock for one-tap access.

TIPS & TROUBLESHOOTING

Things the team asked about most often.

Question	Answer
I am asked to sign in again	Use **Continue with Google** with your High Voltage Industries account. If you were signed in on Safari before installing, you may need to sign in once inside the app. After that it remembers you.
Will I get updates?	Yes, automatically. The app always loads the latest version of the CRM; there is nothing to update in the App Store.
Is data synced with my computer?	Yes. It is the same CRM and the same data, only in a phone-friendly layout.
Dark mode	Tap the sun/moon button next to your name in the menu (≡ at the top-left) to switch between light and dark.
Where is the menu?	Tap the ≡ button at the top-left to open the navigation (Pipeline, Leads, Projects, DTC, and more).
The option is missing	Open the link in Safari (not inside Gmail, Slack or another app). Update iPhone to iOS 16.4 or newer if the menu still does not show it.
How do I remove it?	Press and hold the icon, tap **Remove App**, then **Delete from Home Screen**. Your data stays in the CRM.
Using Chrome on iPhone	Recent iPhone versions can also do this from Chrome (Share → Add to Home Screen), but Safari is recommended.
